

Your Material Advantage.

Fabric solves a lot of problems. It sets a tone of quality with a high-end finish, and you can use it to create a variety of effects. Fabric stretches to look rigid and solid when you want it to, or suspends from a ceiling to wave gently in the breeze. Unlike vinyl banners that can look cheap or shiny in some applications, many of our fabrics are non-reflective, and great for flash-photo backdrops. From triple-weave silk to free-flowing spandex, bluemediTM gives you all kinds of options to choose from. Each fabric is dye-sublimated, with the ink permanently steamed into the material, not ironed-on. They can be washed or dry-cleaned. Plus, they don't wrinkle, so you can fold them tight for travel. When you unpack them at your destination, they always look fresh and new.

Features

- Dye Sublimated
